316L stainless steel construction with EC plug fan and heat reclaim capability

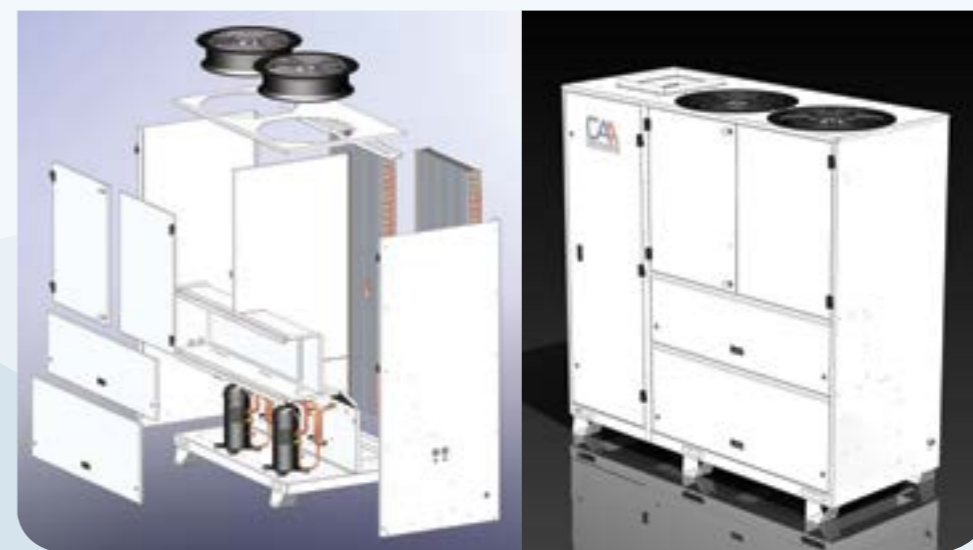

High level of capacity regulation through multi-compressor design

**OUR PRODUCTS ARE MADE TO WITHSTAND AUSTRALIAN CONDITIONS**

SPLIT & PACKAGE PRODUCT LINE FROM 12 – 350KW MODELS

# SMART INDUSTRIAL AIR CONDITIONING

TECHNOLOGY WORKING FOR YOU

## BACKGROUND

Comm Air Australia prides itself on the wealth of air conditioning knowledge its employees have. While the company itself is relatively young, it hides the fact that her employees have worked in the air conditioning industry for periods in excess of 25 years each. This translates to in-depth knowledge of the subject.

## PRODUCT SOLUTIONS

We strive to produce tailored solutions to clients projects, as evidenced by some of the varied projects we've been involved with since our inception.

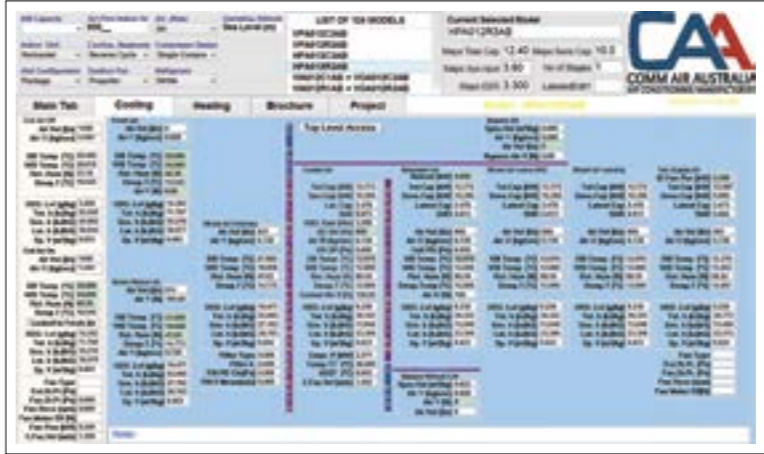

## KEY FEATURES

- > Designed to operate in challenging environments
- > Built to last
- > Reliable
- > Quiet
- > Easy to service and maintain
- > Built with quality components to ensure dependability

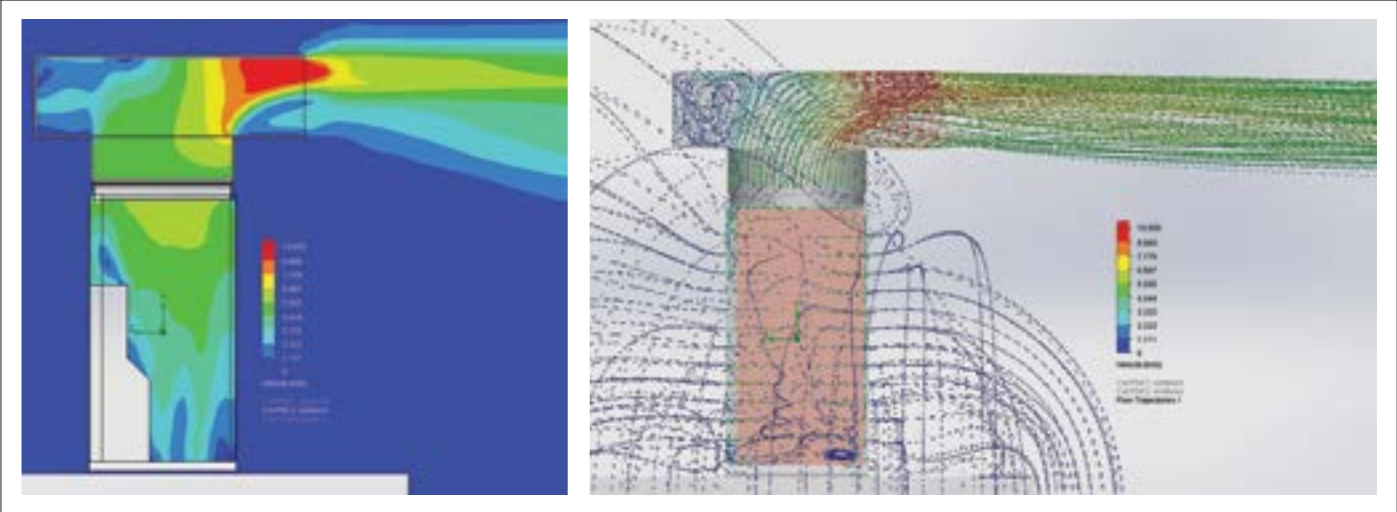

## TOOLS OF THE TRADE

Software Selection Program (SSP) providing psychrometric analysis at a glance.

Computational Fluid Dynamic (CFD) analysis available upon request.

In depth refrigeration and air conditioning knowledge at our clients disposal.
